IntelliSense for CSS class names in HTML

A Visual Studio Code extension that provides CSS class name completion for the HTML `class` attribute based on the definitions found in your workspace or external files referenced through the `link` element.

```
74         </div>
75     </div>
76     <pre>{{submitted}}</pre>
77     <button class="btn btn-primary btn-"
78         type="submit"
79         ng-click="submitted = true"
80     </form>
81 </div>
```

- btn-block
- btn-danger
- btn-default
- btn-dropdown
- btn-glyph
- btn-group
- btn-group-justified
- btn-group-lg
- btn-group-sm
- btn-group-vertical
- btn-group-xs
- btn-info
